

# CLIENT HARD DRIVE Content Release Form

I/ We, \_\_\_\_\_,  
hereby acknowledge that (name of person/company) Pro8mm is not responsible for any content on my personal hard drive. Client owned hard drives need to be delivered empty. Any content remaining on the drive at the time of delivery to Pro8mm will be erased and client will hold Pro8mm harmless for said erasure.

Pro8mm will reformat your drive to be able to encode in our workflow. I understand that I will be charged a \$50 docking fee when using my personal hard drive to cover the labor time for this. I understand that Pro8mm reserves the right to refuse any hard drive delivered with content on it. I have read the company policy as printed in Pro8mm's Limitations of Our Liability as follows.

## Hard Drive/Tape Stock Policy:

"Pro8mm recommends that you purchase our in house tape stock and hard drives for your scanning work to ensure the highest quality and reliability. We will not accept any used tape stock. We will not accept responsibility for glitches, unstable color or picture or any other problems arising from the use of client video tape. If you are scanning to a hard drive, Pro8mm recommends that you purchase one of our portable hard drives that can be reused without docking fees. Client provided hard drives must be "empty". A USB connection and power supply must be provided. A \$50 docking fee will be charged for all client provided drives. **Pro8mm will assume no responsibility for any existing material on any client provided hard drive or video tape.**"
