Hard Drives for Digital Files:

Hard Drives are Available for Purchase or you may supply your own:

- I will purchase one from Pro8mm _____
- I supply my own (must be empty and un-formatted)

* You must indicate a format for your computer. PC (NTFS) MAC (HFS+) XFAT

****You MUST select a format. Jobs will not be completed until a drive is provided to Pro8mm and a format is chosen. ****

DISCLAIMER: Due to the fragile nature of aging video tapes, Pro8mm is unable to accept any responsibility for damaged tape should issues occur during the process. We strive to handle your video tapes with most integrity and care. Should damages occur during the process, it will be replaced with an equivalent amount of tape stock. We can not assume liability for the content value of your material.

Note: All encoding is charged with a **30-minute minimum**. If you choose to supervise or only **encode select scenes**, you will be charged \$120/hr based on the time your project is the encoding suite. For hard drives, you can purchase a Pro8mm professional hard drive (recommended) or you can provide your own hard drive (**which must be empty, we are not responsible for lost files**). **Know your flow.** Pro8mm has many formats, outputs, and frame rates- offering you thousands of potential combinations for your workflow. Pro8mm will not take responsibility for something your system can't handle or you do not understand how to use. Test your workflow. If you are not sure, we can help you. **NTSC** refers to the American Standard. **PAL** is the European Standard. Encoding SD formats to 23:98p is NOT recommended. We will not be responsible for artifacts caused by this request.
